- Custom Outcome Measures can be added for any diagnosis
- Custom measures entered for a diagnosis will be able to be chosen for further measures entered.

Efficacy Outcomes Warning

- If there are no efficacy outcomes entered when saving the treatment episode, a reminder informs that efficacy outcomes are required.

National Immunoglobulin Database – Version 4 Updates

Enhancement	Comment
Update to the Diagnosis List	Diagnoses whose priorities have altered with the Clinical Guidelines Second Edition Update have been updated to reflect these changes.
Clearer Efficacy Outcome Entry	The efficacy outcome section has been moved to the top of the treatment episode details form. Outcomes for review form will show relevant outcomes to the diagnosis. Custom outcomes can be entered.
Efficacy Outcome Warning	Upon saving a treatment episode, a warning to enter Efficacy Outcomes at the next visit to the treatment episode appears if there are none entered.
Review Date notification	Notification of the final review date is shown on the patient list and treatment episode.
Updated Data Validation	Height, Weight and NHS number have data validation.
Add/Copy Infusions Data Validation	Date validation added, Maximum value of 50grams per vial, Maximum value of 10 number of vials.
